

<CV>

Marcin Buglewicz

Frontend Developer

.about me

For past 8 years worked as the only tech-savvy employee in small company tasked with various assignments but mostly to individually plan, design and implement business website and CMS for it. Because I had a freedom of choice of technology used and was decision maker for many things, I ended up using primarily Vue.js as my frontend framework. I have practical experience with fullstack creating real-estate app from idea to deployment.
